

New: Biopsy Valves

Dear Sirs,

Medi-Globe offers newly in its range latex-free biopsy valves to cover and seal the accessory channel inlet of gastroscopes, colonoscopes and duodenoscopes. The valves are available for Olympus, Fujinon, Storz and Pentax endoscopes.

The valves

- facilitate the insufflation and suction function during an endoscopic procedure.
- help to prevent leakage and splashing of potentially hazardous bodily fluids for the protection of the patient and medical staff when exchanging endoscopic instruments during procedures.

The product version with an irrigation line and Luer-Lock adapter provides connectivity to a syringe or external water pump.

Biopsy Valves – single use, individually packed in a dispenser

| Catalog No. | Description | Colour | Unit |
|---------------|--|--------|------------|
| GAC-04-00-001 | Biopsy Valve, compatible to endoscopes of: → Olympus → Fujinon (500 Series and newer) → Storz | Blue | Box of 100 |
| GAC-04-01-001 | Biopsy Valve, compatible to endoscopes of: → Pentax | Red | Box of 100 |

Biopsy Valves with Irrigation Line and Luer-Lock Adapter – single use, individually packed in a dispenser

| Catalog No. | Description | Colour | Unit |
|---------------|--|--------|-----------|
| GAC-04-00-002 | Biopsy Valve, compatible to endoscopes of: → Olympus → Fujinon (500 Series and newer) → Storz | Blue | Box of 50 |
| GAC-04-01-002 | Biopsy Valve, compatible to endoscopes of: → Pentax | Red | Box of 50 |

FlexiBite Jumbo – New Versions of Single Use Biopsy Forceps

We expand our offer for single use biopsy forceps with versions to acquire tissue sample with larger volume in one bite. The yield of the **FlexiBite Jumbos** is double of the capacity of the standard biopsy forceps, based on theoretical calculation.

FlexiBite Jumbos are offered as biopsy forceps with coated metal spiral and positioning bands in oval and serrated cup design, each with and without spike.

Their specifications are very similar to Boston Scientific's Radial Jaw 4, which is important to know to position FlexiBite Jumbo against Radial Jaw 4 in bids and tenders

The **FlexiBite Jumbo** single use biopsy forceps requires a minimum accessory channel diameter of 3.2 mm.

Oval Cups

Oval Cups with Spike

FlexiBite Jumbo – Biopsy Forceps with extra large Cups, Coated Metal Spiral with Positioning Bands, sterile packed

| Catalog No. | Cup Shapes | Outer Diameter | Working Length | Minimum Accessory Channel Diameter |
|---------------|----------------------|----------------|----------------|------------------------------------|
| GBF-21-30-230 | Oval Cups | 3.0 mm | 230 cm | 3.2 mm |
| GBF-22-30-230 | Oval Cups with Spike | 3.0 mm | 230 cm | 3.2 mm |

Serrated Oval Cups

Serrated Oval Cups with Spike

FlexiBite Jumbo – Biopsy Forceps with extra large Cups, Coated Metal Spiral with Positioning Bands, sterile packed

| Catalog No. | Cup Shapes | Outer Diameter | Working Length | Minimum Accessory Channel Diameter |
|---------------|-------------------------------|----------------|----------------|------------------------------------|
| GBF-23-30-230 | Serrated Oval Cups | 3.0 mm | 230 cm | 3.2 mm |
| GBF-24-30-230 | Serrated Oval Cups with Spike | 3.0 mm | 230 cm | 3.2 mm |

Event Calendar 2011

| Exhibitions | Date | Location | Booth No. |
|---|-----------------------|---|-----------|
| Digestive Disease Week (DDW) | May 8 – 10, 2011 | McCormick Place Chicago, USA | 1318 |
| Annual Congress of the European Respiratory Society (ERS) | September 24-28, 2011 | Amsterdam RAI, Amsterdam, The Netherlands | n.a. |
